The Unmanned Aircraft System industry continues its growth in Nevada. This monthly networking forum is designed to keep interested Nevadans up-to-date on the developments. Please join us for our next networking and information gathering.

**DISTINGUISHED SPEAKERS**

**Corpnet, Inc.** is a management consulting firm with a long history of helping small businesses get on their feet in Nevada. Edwin Nichols, CEO, CIO of Corpnet has a long history of management consulting ranging from consulting Fortune 500 companies, small businesses, and the government. He will discuss the impact that UAS has, and will have, on the Nevada economy and the integration of capital, both SBIR/STTR, and private funding, to promote UAS in Nevada.

**Space Information Laboratories (SIL)** is a California-based company providing GPS Tracking, Avionics and Power Systems for DoD and NASA launch vehicles and small satellites. SIL is also developing UAS sense and avoid technology. Marty Waldman is the manager of the Nevada office, and will discuss the capabilities of sense-and-avoid technology as it relates to current UAS integration into next generation airspace. Marty will also discuss his affiliation with the American Institute of Aeronautics and Astronautics (AIAA) and its impact in Nevada.
